## AUTODESK® CERTIFIED USER EXAM

Are you an aspiring building design and construction professional? Would you like to expand your Autodesk Revit® Architecture software skills and prove your proficiency?

Advance your career by becoming an Autodesk Revit® Architecture Certified User. Whether you're a student or a professional, this software certification will validate your skills, fulfill academic and industry requirements, and boost your design career.

### ACU EXAMS

As Autodesk's exclusive provider for the Certified User program, Certiport makes Autodesk Revit® Architecture certification easier with a unique three-step pathway:

- 1. LEARN** (or review) how to use Autodesk Revit® Architecture with content-rich textbooks, online courseware, video resources, and more.
- 2. PRACTICE** by using interactive exam-preparation tools and practice exams. Build the confidence you need to take the Autodesk Revit® Architecture Certified User Exam.
- 3. CERTIFY** and validate your skills by passing the exam and receiving your official certificate.

We've designed the Autodesk Revit® Architecture Certified User program for those who are relatively new to the software and want to prove their basic proficiency.

The Autodesk Revit® Architecture Certified User Exam includes multiple-choice and performance-based questions. Following are some examples of software aspects covered in the exam:

- Navigating the user interface and managing files
- Working with views, including creating camera views

- Creating levels, walls, doors, and windows
- Handling components, columns, and grids
- Creating stairs, railings, roofs, and floors
- Sketching, annotating, and scheduling

Before you take the Certified User exam, we recommend that you complete a 3D design course at a secondary institution and get 50 hours of hands-on experience with Autodesk Revit® Architecture (a free student version is available). For information about available resources to help you learn, practice, and certify, contact your Certiport representative.

## WHAT'S ON THE EXAM?

Refer to the chart on this page for a list of skills covered by this exam.

### AUTODESK CERTIFICATION EXAM TOPICS AND OBJECTIVES

The Autodesk Certified User Exam Contains 30 questions. The majority of these require you to use Autodesk Revit® software to create or modify a data file, and then type your answer into an input box. Other question types include multiple choice, matching and point-and-click. You will have a 75 minute time limit (in some countries, the time limit may be extended). The chart shows you the skills you will be expected to demonstrate on the exam. Keep in mind that some of the skills listed may not be tested on your specific certification exam; however, you should prepare to demonstrate your mastery of them all.
